Looking at the body's constitution, based on the five elements, can bring awareness to imbalances in the skin, which can be further broken down into the doshas of vata, pitta & kapha.

Understanding the body types allows the esthetician to customize treatments to individuals, and herbal oils and remedies can then be incorporated into daily living. This helps bring balance to the client with their natural rhythms, and the cycles of day and night through skin therapies, yoga and meditation. Visit us in booth 1026.
